Thanks. I was just checking on to make sure you had what you needed. Sounds like you're all set.

Hey Marty,

Are any of these questions still outstanding? Or have they been resolved by themselves?

Thanks!

Just saw this note. Sorry. Sounded like there are viewer discussions underway.

Anything still outstanding we need to deal with?

Hi Paula,

Marty asked for my help with his questions below.

Here are my thoughts:

1. I think we are transitioning completely away from the epaosc.org website, correct? So I would say that yes, we should take everything not related to the viewer off that website so that we have it in one place and there isn't confusion with one website not being kept up-to-date.

I have been hoping we could have done this days ago but no PIOs had the time to sit down and discuss it with the FOSC (me). You REALLY NEED to check in with the R8 IMT before you remove the SitReps. You removing them without checking with IC Craig Myers or at least his Planning Chief Dee Rothery could really impact his operations.

2. I don't know why we would keep the viewer on there, but have asked Marty that question.

I really don't know either but Dan Burgo has taken my place at Area Command and I ask that you just please check in with him to verify. I am not sure how the specifics of their final deployment shaped up and I would just prefer to be careful.

3. Have you discussed down there what we are doing/want to do with the spatial data viewer?

I surrendered when HQs just went out and did one themselves. I hear that Melissa realized that ours was much better and motivated ours to be installed. Check with Dan.

4. In Tim's absence, can I ask Jeff Morin to help (if we decide to remove the information from the eosc.org website)

Again, Dan would be a better choice.

Thanks,

Rebecca

I still would love to get together to discuss:

1) pulling all the information NOT related to the viewer off of the epaossc.org website.

2) what would need to be done should we ever decide the spatial data viewer is a useful tool to inform the public.

See the attached report that we run every day to track web traffic on the epaosc site.

Many of my responsibilities are transferring to the field today so we may want to talk before I become much less available.

M
